FAT PROPHETS MINING AND RESOURCES MODEL PORTFOLIO

About the model portfolio

INVESTMENT OBJECTIVE:

The Fat Prophets Mining & Resources Model Portfolio (the 'Model') seeks to outperform the total return (both income and capital growth) of the S&P/ASX 300 Resources Accumulation Index, before taking into account Model fees and expenses.

INVESTMENT STRATEGY:

The Model aims to achieve its investment objective by investing in a sample of mining and resources securities listed on the ASX. The sample of securities is likely to contain securities both within and outside of the benchmark, the S&P/ASX 300 Resources Accumulation Index ('Index'). The Index is comprised of approximately 70 mining and resources securities listed on the ASX. The Model typically holds 10 to 40 securities and may retain up to 25% in cash.

DESIGNED FOR INVESTORS WHO:

- Seek exposure to mining and resources companies listed on the Australian Stock Exchange;
- Are indifferent as to whether their return is generated from growth of capital or income;
- Are prepared to accept the significant risks and volatility attached to such securities.
